For Immediate Release

New Release of Maxthon Cloud Browser Introduces Cloud Sharing to Let People Share Web Content via Maxthon Browsers

Enabling Web Content Pushing, Downloading and Syncing Across Multiple Devices, Maxthon Cloud Browser now Extends to Friends' Devices.

CES, Las Vegas, NV -- January 8, 2013 – [Maxthon](http://www.maxthon.com), a global software company that develops state-of-the-art web browsers, today announced the addition of cloud sharing to its latest release candidate of the Maxthon Cloud Browser, which launched in preview December 10, 2012. Maxthon's Cloud Browser gives users a seamless web browsing experience across their own multiple devices and platforms. The new release lets them share web content with their friends through the Maxthon Cloud. Maxthon Cloud Browser, which works on Windows, Mac, iOS and Android, is available to download at www.maxthon.com.

"Maxthon Cloud Browser has already gained tremendous popularity globally since its launch last month. The introduction of cloud sharing in this new release adds an important dimension to our concept of seamless browsing and represents another key step in our strategy of integrating web services through the focal point of every Internet experience: the browser," said Jeff Chen, CEO of Maxthon.

Maxthon's new **Cloud Sharing** gives users the ability to share content they find on the Web quickly and easily by pushing the files directly to their friends' Maxthon browser or via SMS. Cloud sharing makes it easy for users to send selected text, images, maps, directions and entire web pages to anyone using Maxthon Cloud Browsers *or* via SMS, in any country.

"This is a multi-device Web and the Maxthon Cloud Browser is addressing the need to connect our web experiences in a way that no other browser is doing," said Karl Mattson, GM of Maxthon's International Group. "Maxthon Cloud Browser has struck a resonant chord with our global community, and together, we're building on the promise of seamless browsing."

About Maxthon Ltd.

Founded in 2005, Maxthon Ltd is a global software company that develops state-of-the-art web browsers that regularly outperform other top browsers. Committed to high standards for innovation, the Maxthon suite of browsers supports a wide range of devices from desktops to mobile.
